2N1 has been specially formulated for use in citrus houses and other types of packing facilities where wax buildup and heavy duty grime require constant cleaning. Proper application will allow any user to quickly strip wax buildup from processing machinery. As the wax is being broken down, 2N1 is also cleaning the grease, grime and dirt commonly seen in food processing facilities. By combining two cleaning technologies into one powerful solution, 2N1 is designed to reduce man hours and machinery downtime by 50%. These expense reductions will increase your facilities output and in turn increase the bottom line.

NOTE: Not for use on aluminum. May cause damage to non-ferrous metals and painted surfaces in concentrated form.

DIRECTIONS:

Dilute 1 part 2N1 to 5 parts of water. Different soil conditions may require heavier concentrations. For severe situations, use 2N1 without dilution. Always rinse food contact surfaces with potable water.
