

REMEDIATE

OUTDOOR
& INDUSTRIAL
MAINTENANCE

HYDROCARBON SPILL AND REMEDIATION AGENT

REMEDIATE is a concentrated, low foaming fluid for clean-up and biological elimination of misplaced petroleum/food hydrocarbons. It is a concentrate that can be diluted with COOL water before use to provide greater economy. Applications include any type of hydrocarbon spills on most hard surfaces, including foliage, rocks, concrete, asphalt, soil, sand and water. During cleaning, hydrocarbons are emulsified and encapsulated, inhibiting release of VOC's, eliminating sheens, and preventing adherence to surfaces downstream. Select microbes added to **REMEDIATE** continue to eliminate unwanted waste long after the cleaning process is complete.

FEATURES & BENEFITS:

Non-fuming- No noxious odors.

Environmentally sound- Safe to use.

Low foaming- Ideal use on any application, including water.

APPLICATIONS:

Ideal for use on concrete, foliage, soil, asphalt, water and most hard surfaces to clean -up and biologically eliminate petroleum and hydrocarbons.

DIRECTIONS:

Hard Surface Cleaning: For higher viscosity hydrocarbons and to enhance bio-remediation, use 1:10 parts water. For maximum encapsulation and VOC reduction, use 1:3 parts water. Apply with high or low pressure followed by agitation with brushes, mops, or a high pressure rinse.

Application On Water: Absorb or vacuum excess hydrocarbons. Use from full strength to 1:5 parts water. Apply using as much pressure as possible directly on floating oil. Provide mechanical and/or allow wave action to fully disperse.

Bio-remediation: Dilute 1:10 with COOL water and apply liberally. Agitate with brooms or use high pressure rinse to blend hydrocarbons. Water the area and avoid run-off. Re-application of product and/or re-watering will stimulate microbial reproduction and yield faster results.

Vapor and Odor Control: Dilute with 3 parts water. Some type of agitation must be provided to insure that the product and hydrocarbons become well mixed. Rinse or flush with water.

FORMULATION:

A proprietary blend of biological remediating compounds.

TARGET ACCOUNTS:

Construction companies, heavy equipment companies, mechanics, road and paving companies or anywhere oil is spilled.

SPECIAL CAUTIONS:

None

PACKAGING AVAILABILITY

Bulk liquid: 1g, 6g, 15g,
30g and 55g drums
