

# AQUA THERM

## HOT-WATER-PARTS-WASHER ADDITIVE

OUTDOOR  
& INDUSTRIAL  
MAINTENANCE

**AQUA THERM** have been designed as an additive for use in all hot and warm water circulating parts washers. It is ideal for both ferrous and non-ferrous metals. The blending of detergents, solvents and emulsifying compounds in **AQUA THERM** enables it to penetrate the most difficult oil and grease-bearing soils. The addition of high-tech surfactants reduces surface tension on major soils, allowing the compound to penetrate the target soil and lift it from the surface. **AQUA THERM** is a nearly neutral pH with very low vapor emission even under a heated condition. The addition of this compound to your aqueous based parts cleaner will save time and money with reduced cleaning time, ease of use, safety and economy of dilution.

### FEATURES & BENEFITS:

**Powerful-** Penetrates most grease and oils.

**Neutral ph-** No harsh solvents, safe to use.

**Versatile-** Use on ferrous and non-ferrous metals.

### APPLICATIONS:

Designed to be used as an additive for all hot and warm water circulating parts washers.

### DIRECTIONS:

**AQUA THERM** is not designed for use in Mart Washers or other high-velocity cabinet washers. Use **AQUA THERM** straight. The optimum working temperature range is between 100° and 190° F. Parts left in direct sunlight for 30 minutes to an hour, prior to immersion in your parts washer will strip at a faster rate. Always pre-heat your solution prior to parts immersion. Always remove heavy grease/dirt deposits with a putty knife prior to immersion. This practice will expedite the cleaning process as well as increase the longevity of your cleaning solution. **AQUA THERM** contains corrosion inhibitors. However, in some cases, some metals will oxidize shortly after being stripped by this or any other product. We recommend the use of one of **SUNRISE'S** anti-corrosion coatings if oxidation is present. Consult your **SUNRISE** Representative for the proper compound.

### CUSTOMERS WHO USED THIS PRODUCT ALSO USED:

### PACKAGING AVAILABILITY

Bulk liquid: 1g, 6g,  
15g, 30g and 55g  
drums

**PART #2085**

### QR CODE:

### FORMULATION:

Ph neutralizers, buffering agents and complex saturation compounds.

### TARGET ACCOUNTS:

Cities, parks, counties, machine shops, auto shops, tire shops, etc.

### SPECIAL CAUTIONS:

None.
